

# Serendipity

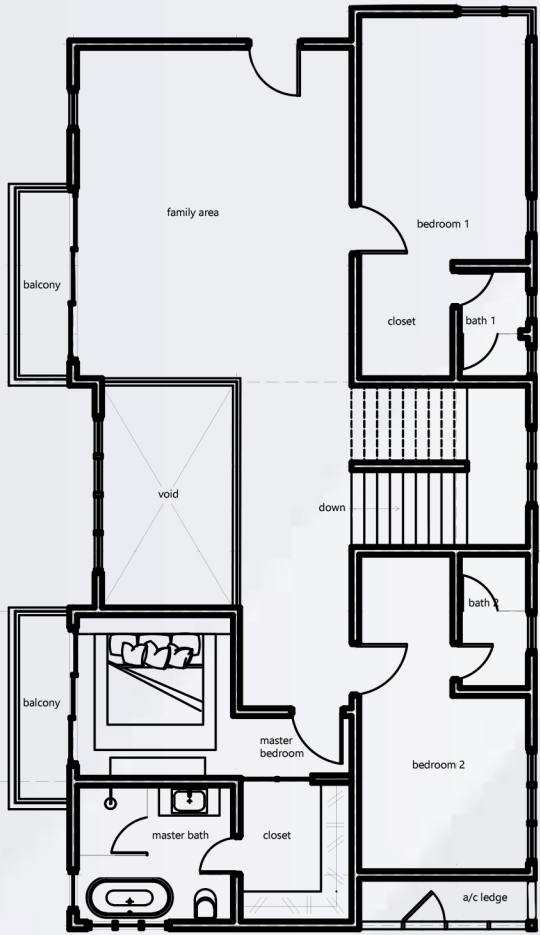

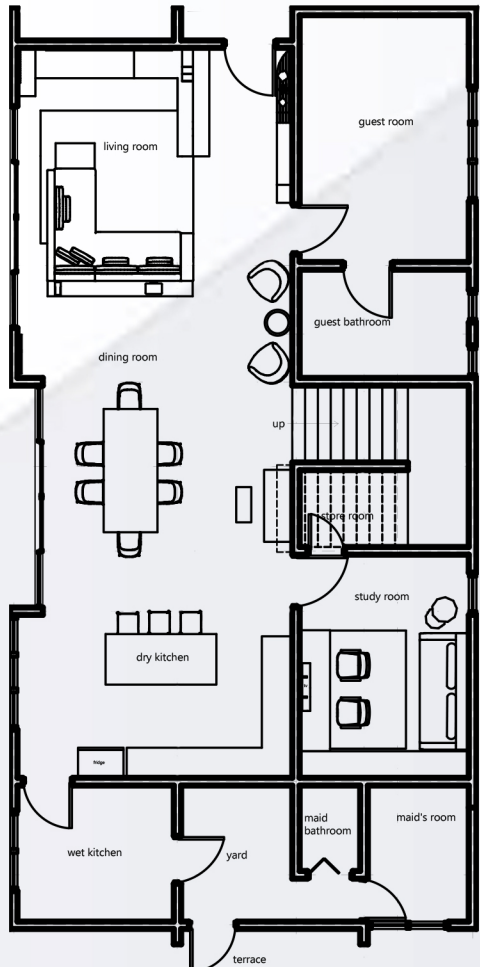

is a delicate touch of contemporary design with the modest use of black aluminium and bronze, complementing the warm tone wood material that dominates most of the spaces. The idea is to introduce a sense of welcoming and belonging while adding a bit of exquisite surprise elements, but not exaggerated.

The way my dream home is pictured has to be comfortable, sophisticated & modern, embedded with a tinge of luxury, but not overdone. With the use of Daikin's HCAC products, the overall spaces could be blended well with its minimal outlook and relishing the full beauty of the spaces by keeping the elements in harmony without any left offbeat.

Dry Kitchen

Furniture Layout Plan

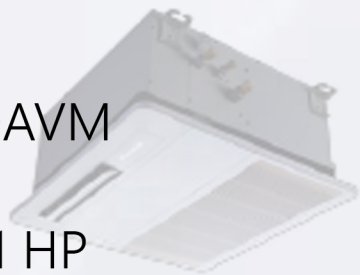

## Daikin Airconditioning (HCAC) Analysis & Design Concept Descriptions

### Dry Kitchen

Light Granite countertop with white laminated kitchen cabinets give off a spacious and clean feel, complemented by the white marble island and bronze & black aluminium pendant lights.
